

Associate Degree Scheme in Business (8C108)

Scheme Intended Learning Outcomes

Upon successful completion of respective programmes of the **Associate Degree Scheme in Business**, graduates will be able to:

- S-ILO-1 **IT and Quantitative Skills:** Apply information technology and quantitative skills in dealing with issues and problems in the general business context.

- S-ILO-2 **Communication:** Communicate in both English and Chinese for presentations as well as interpersonal and general business communication.

- S-ILO-3 **Critical Thinking:** Analyse and evaluate information, ideas, arguments and issues critically, and make decisions that are informed by evidence in their chosen areas of specialism.

- S-ILO-4 **Problem Solving:** Integrate and apply the knowledge and skills acquired in their programme of study to deal with problems that they may encounter in daily life and in their chosen areas of specialism in the business setting.

- S-ILO-5 **Different Perspectives:** Identify issues and problems from different perspectives, drawing upon relevant knowledge and skills in non-business disciplines such as humanities and culture, social sciences, science and technology.

- S-ILO-6 **Ethical and Professional Attitude:** Articulate their professional and ethical responsibility, and demonstrate professional attitudes in dealing with issues and problems in the general business context.
